

**Virginia Commonwealth University
School of Engineering
Faculty Position in Computer Engineering**

The Electrical and Computer Engineering Program at Virginia Commonwealth University's School of Engineering seeks to fill a tenured/tenure-track faculty position in computer engineering. **The primary interest is in candidates at the level of Associate or Assistant Professor, but strong candidates at the Professor level will also be considered.** Candidates with an excellent record in sponsored research and teaching will be considered for the more senior ranks. Primary research areas of interest include, but are not limited to, embedded systems, hardware/software codesign, systems-on-a-chip, and computer applications in biosensing and biomedicine. Particularly attractive is experience that demonstrates an ability to initiate interdisciplinary research across diverse areas. Collaborations are encouraged with other VCU units such as the VCU Medical Center and the School of Business. An earned PhD in Computer Engineering or a closely related field is required.

In operation since the fall of 1996, the VCU School of Engineering offers ABET accredited undergraduate and graduate programs in Computer Science, Biomedical Engineering, Chemical and Life Sciences Engineering, Electrical Engineering, Computer Engineering, and Mechanical Engineering. The School is located in a new 147,000 square foot building with exceptional classroom, laboratory and computational facilities. A new building that will co-locate a portion of the School of Engineering along with the School of Business is under construction and slated to open in January of 2008. This facility will provide over 100,000 additional square feet of state-of-the-science lecture halls, laboratories, and office areas for the School of Engineering as well as providing common areas to maximize the synergy of the two Schools' students, professors and programs. The Electrical and Computer Engineering Department currently has 12 full time faculty members with an annual research expenditure of over \$2 million. Additional information about the ECE Department and the School of Engineering can be found at www.egr.vcu.edu

Candidates should include in their response a clear statement of their teaching and research interests, a curriculum vitae summarizing their educational and professional backgrounds together with a list of published works, and the names and email addresses of three references to: Chair, Faculty Search Committee, Electrical and Computing Engineering, School of Engineering, Virginia Commonwealth University, P.O. Box 843072, 601 West Main Street, Richmond, VA 23284-3072.

Virginia Commonwealth University is an equal opportunity/affirmative action employer. Women, minorities, and persons with disabilities are encouraged to apply.
